SIX FLAGS THEME PARK INC

PO BOX 120

Type: ROUTINE INSPECTION

JACKSON, NJ 08527

Date: 13 March 2013

3.101 (a)(3)

FACILITIES, GENERAL.

(a) Construction requirements.

(3) All surfaces in a primary enclosure must be constructed of durable, nontoxic materials that facilitate cleaning, and disinfection as appropriate, sufficient to maintain water quality parameters as designated in 3.106. All surfaces must be maintained in good repair as part of a regular, ongoing maintenance program. All facilities must implement a written protocol on cleaning so that surfaces do not constitute a health hazard to animals.

SEA LION HOLDING POOLS

The following items need to be addressed:

The top edges of two of the holding pools have missing paint and damaged concrete. The damage is present behind the secured, floating docks and appears to have been caused by the docks continually banging against the pool walls. The missing paint and damaged concrete leave the pool edges in disrepair thus limiting the ability for appropriate cleaning and disinfection.

The damaged edges of the holding pools must be repaired and sealed in order to provide adequate structural strength and sanitizable surfaces.

TO BE CORRECTED BY: JUNE 15, 2013

The exit briefing was conducted with the facility representative.
